Specifications Sheet: Model HN-CL5000 50 Ton Scissor Jacking System

- Capacity: 50 ton
- Length: 72"
- Width: 37"
- Weight: 5350 lbs.
- Height:
 - Retracted: 20"
 - Extended: 64"
- Load side shift: +/- 8" (16" total)

Features of this lifting system:

- ✓ Patented design
- ✓ Cars are not split for wheel changes
- ✓ Jack uses the tracks (Rail Head) as the jacking base surface
- ✓ Lightweight lifting blocks are placed on coupler shanks to provide an even, flat contact surface for the jack and allow space for coupler operating mechanism
- ✓ Jack is easily relocated with a 12,000 LB forklift
- ✓ Ideal for coal cars, grain cars, tank cars, and box cars

The power unit is available in:

1. Gas c/w electric start
2. Electric - 220V or 600V 3ph
3. Tethered or radio remote control operation
